

# Bead Head Thorax PMD Emerger

**Class:** Emerger

**Originator:**

**Source:** Solitude

## Clay's Notes

The Beadhead PMD Emerger Thorax is the bug that will get down on the bottom using a hidden bead. It is a realistic looking bug with a hidden bead. It will do what a normal beadhead nymph will do but it is a more imitative pattern. I have used this pattern on Montana Rivers with great success. It is available online where they sell Solitude flies.
