

Henry's Fork Caddis

Class:	Dry Fly – Caddis
Matches:	Most any Caddis by matching the size and coloration of the Natural
Originator:	Rene Harrop
Source:	Retailer of Solitude Flies or The Yellowstone angler

Clay's Notes

Developed by Rene Harrop, the *Henry's Fork Caddis* is a superb pattern for large wary trout in slick water. The Henry's Fork Caddis is the perfect pattern on the flat surface and micro current laden Henry's Fork River. The Henry's Fork Caddis blends the ultra-life like profile with natural materials, which makes it the perfect slick water caddis pattern! I stop at Rene's fly shop "The Truthhunter" every time I drive through Island Park to see what new creations he's come up with. This is one of his best!
