

King Kong Hopper

Class: Other - Terrestrials

Originator:

Source: The Fly Shop

Or Tie Your Own

Clay's Notes

The King Kong Hopper is a dual purpose fly that floats high enough to support a bead head nymph and has an active, life-like silhouette that trout just can't ignore. King Kong Hoppers are tied with both foam and buoyant elk hair giving them cork-like floatation and yet maintain realistic profiles.

King Kong Hopper Tying Recipe
