

Translucent Caddis Pupa

Class: Emerger / Cripple - Caddis

Matches: Most Caddis by matching the size and coloration of the natural

Originator: Unknown

Source: Retailers of Solitude Flies

Clay's Notes

This is a pattern from Solitude Flies. The color of the fly body may be related to species, which in many cases will be shades of insect green to dark olive, cream and tan, all be it colors such as hot orange can be deadly at times, particularly late evenings. This fly works really well on the Lower Yuba River and has become one of my favorites when the caddis are buzzing in the bushes.

This fly is available at fly retailers that sell Solitude Flies.
